TRAITÉ

THÉORIQUE ET PRATIQUE

DES

MOTEURS A VAPEUR

COMPRENANT PRINCIPALEMENT:

L'ÉTABLISSEMENT DES GÉNÉRATEURS ET DE LEURS APPAREILS DE SURETÉ, LES DIVERS MODES DE DISTRIBUTION, D'APPAREILS ALIMENTAIRES ET DE CONDENSATION
TOUS LES SYSTÈMES DE MACHINES A VAPEUR FIXES, A UN ET DEUX CYLINDRES,
LES LOCOMOBILES ET LES LOCOMOTIVES, LES APPAREILS DE NAVIGATION, LES MACHINES A AIR CHAUD ET A GAZ, ETC.

PAR ARMENGAUD AINÉ

TABLE DES PLANCHES

DES MOTEURS A VAPEUR

TOME PREMIER

Planches.	Pages.
1. Générateur à bouilleurs de 25 mètres carrés de surface de chauffe	115
2. Dispositions diverses de générateurs à corps cylindriques	164
3. Cheminées des générateurs à vapeur	125
Chaudière verticale appliquée à un four à réchauffer	178
4. Générateurs tubulaires et à foyers intérieurs. — Systèmes de Saint-Germain et de Cornwall.	190
5. Générateur tubulaire à vent forcé de MM. Molinos et Pronnier	205
6. Foyers fumivores de divers systèmes	231
7. Appareils de sûreté. — Manomètres. — Indicateur de vide et de température	255
8. Appareils de sûreté. — Soupapes, niveaux d'eau et flotteurs	272
9. Dispositions générales d'un moteur à vapeur	312
10. Mécanismes de distribution. — Tiroirs simples	362
11.) Mécanismes de distribution. — Détente du système de M. Farcot. — Détente par des tiroirs	
12. combinés. — Systèmes divers de détente variable	404
13. Appareils d'alimentation des générateurs	432
14. Appareils de condensation	460
45.) Machines verticales, à mouvement direct, de divers systèmes, par MM. Martin, Lecouteux,	
16.) Bertrand, Lequesne, etc	477
17. Machine verticale à directrices et à quatre colonnes, par M. Farcot	484
18.) Machine horizontale à détente variable sans condensation, avec direction centrale du piston	
49.) à vapeur, par MM. Cail et Cie	502
20.) Machine horizontale à détente variable et à condensation, le condenseur et la pompe à air	
21.) à simple effet placés verticalement, par M. E. Bourdon	511
22.) Machines horizontales à détente variable, de 60 et 20 chevaux, avec condenseur et pompe	
23.) à air à double effet placés horizontalement, par MM. Farcot et ses fils	523
24. Machine horizontale à détente variable, avec pompe à air verticale, par M. Bréval	534
25. Machine horizontale, avec pompe à air inclinée, par MM. Legavrian	543

TOME DEUXIÈME

Planches.	Pages.
26. Machine à balancier et à basse pression, par MM. Hick et Rothwell	
27. Machine à balancier à détente variable et à condensation, par M. Farcot	. 21
28. Machine à deux cylindres à balancier et accouplées, par M. T. Powell	. 42
29. Détails de construction des machines à deux cylindres de MM. T. Powell et Legrand.	. 51
30. Détails de construction des machines de MM. Nillus, Stehelin et Mazeline	53
31. Détails de construction des machines de MM. Boyer et Farcot	59
32. Détails de construction des machines de MM. Lecouteux, Alexander et Scribe	65
33. Machine à deux cylindres, horizontale, par MM. Boudier frères	75
34.) Machine à simple effet (système de Cornwall), par M. Schneider. — Coupe longitudinale	9
35.∫ et vue de côté. — Détails de la distribution	
36. Machine locomobile, par M. Rouffet	
37. Machines locomobiles, par MM. Flaud et Tuxford	120
38. Machine locomotive-tender, par M. Buddicom. — Coupes longitudinale et transversales.	
Coupe de la caisse à eau Plan du mécanisme	
40.)	
41. Locomotive de montagne de M. Ed. Beugniot, et construite par MM. A. Kæchlin et Cie	
42. Appareil du yacht impérial l'Aigle, par MM. Mazeline et Cie. — Coupe transversale de	
la machine et de la coque du bâtiment. — Coupes transversales et horizontales de	
la machine	345
44.) Appareil à hélice de 1000 chevaux, par MM. Mazeline et Cie. — Coupes transversale,	
45.) horizontale et longitudinale. — Élévation extérieure, plan et coupe	358
46. Appareil à hélice de 30 chevaux, par M. Nillus	377
47. Appareil évaporatoire de marine pour 900 chevaux	386
48. Marteau-pilon à vapeur, par MM. Farcot et ses fils	402
49. Machine dite calorique, par M. Ericcson	428
50. Moteur à air dilaté par la combustion des gaz, par M. Lenoir	441
